

\$5 million to establish a publicly accessible national database of interactions with shark control measures

Party: Australian Greens

Summary of proposal:

The proposal would provide \$5 million over 4 years to establish a publicly accessible national database of interactions with shark control measures, critical for research and education-awareness programs.

The proposal would be non-ongoing, distribute funding evenly over 4 years and start on 1 July 2026.

Costing overview

The proposal would be expected to decrease the fiscal and underlying cash balances by around \$3.8 million over the 2025-26 Budget forward estimates period (see Table 1). This impact reflects an increase in departmental expenses.

The proposal would be expected to have an impact beyond the 2025-26 Budget forward estimates period. A breakdown of the financial implications (including separate public debt interest (PDI) tables) over the period to 2035-36 is provided at Attachment A.

The Parliamentary Budget Office (PBO) has not made any assessment as to whether the specified funding would be sufficient to meet the objectives of the proposal.

Table 1: \$5 million to establish a publicly accessible national database of interactions with shark control measures – Financial implications (\$m)^{(a)(b)}

	2025-26	2026-27	2027-28	2028-29	Total to 2028-29
Fiscal balance	-	-1.3	-1.2	-1.3	-3.8
Underlying cash balance	-	-1.3	-1.2	-1.3	-3.8

(a) A positive number represents an increase in the relevant budget balance; a negative number represents a decrease.

(b) PDI impacts are not included in the totals.

- Indicates nil.

Key assumptions and methodology

The proposal is capped at a fixed amount, evenly distributed over 4 years from the commencement date. All funding is departmental in nature. We assume that no funds allocated to a given year are left unspent.

Financial implications were rounded consistent with the PBO's rounding rules.¹
