

Powering past coal and gas – electrification education campaigns	
Party:	Australian Greens
<p>Summary of proposal:</p> <p>The proposal would provide \$80 million over 4 years to fund national marketing and education campaigns to support informed decisions about electrification. This would ensure everyone has access to the information and support they need to electrify their homes, communities or businesses.</p> <p>The proposal would be non-ongoing, distribute funding evenly over 4 years and start on 1 July 2026.</p>	

Costing overview

The proposal would be expected to decrease the fiscal and underlying cash balances by around \$60 million over the 2025-26 Budget forward estimates period (see Table 1). This impact reflects an increase in departmental expenses.

The proposal would be expected to have an impact beyond the 2025-26 Budget forward estimates period. A breakdown of the financial implications (including separate public debt interest (PDI) tables) over the period to 2035-36 is provided at Attachment A.

The Parliamentary Budget Office (PBO) has not made any assessment as to whether the specified funding would be sufficient to meet the objectives of the proposal.

- Indicates nil.

Key assumptions and methodology

The proposal is capped at a fixed annual amount, over 4 years from the commencement date. Departmental expenses are as specified. We assume that no funds allocated to a given year are left unspent.

Financial implications were rounded consistent with the PBO's rounding rules.¹
