

Powering past coal and gas – review of National Electricity Market	
Party:	Australian Greens
<p>Summary of proposal:</p> <p>The proposal would provide \$10 million over 4 years for a review of National Electricity Market and writing new “household centred” rules.</p> <p>The proposal would be non-ongoing, funding distributed evenly over 4 years of the proposal and start from 1 July 2026.</p>	

### Costing overview

The proposal would be expected to decrease the fiscal and underlying cash balances by around \$7.5 million over the 2025-26 Budget forward estimates period (see Table 1). This impact reflects an increase in departmental expenses.

The proposal would be expected to have an impact beyond the 2025-26 Budget forward estimates period. A breakdown of the financial implications (including separate public debt interest (PDI) tables) over the period to 2035-36 is provided at Attachment A.

The Parliamentary Budget Office (PBO) has not made any assessment as to whether the specified funding would be sufficient to meet the objectives of the proposal.

**Table 1: Powering past coal and gas - review of National Electricity Market – Financial implications (\$m)<sup>(a)(b)</sup>**

Fiscal balance	-	-2.5	-2.5	-2.5	-7.5
Underlying cash balance	-	-2.5	-2.5	-2.5	-7.5

(b) PDI impacts are not included in the totals.

- Indicates nil.

## Methodology and key assumptions

The proposal is capped at a fixed amount, evenly distributed over 4 years from the commencement date. Departmental expenses are as specified in the proposal.
